

Backpack Care and Use Guide

Sample manual for the Luma demo catalogue

This is a demonstration document. It shows how product manuals are offered as downloads with the Software Product Attachments module on the SoftAware Commerce demo store. It is not a real manufacturer manual.

1. Packing

- Place heavier items close to your back and in the middle of the main compartment.
- Use the side pockets for items you need often, such as a water bottle.
- Close all zips fully before lifting the bag.

2. Adjusting the straps

- Loosen both shoulder straps, put the backpack on and tighten the straps evenly.
- The top of the bag should sit just below the base of your neck.

3. Cleaning

- Empty the bag and brush off loose dirt.
- Wipe with a damp cloth and mild soap. Do not machine wash or tumble dry.
- Let the bag air dry with all pockets open.

4. Storage

- Store the bag clean and dry, away from direct sunlight.
